- Medical Instruments
- Glass
- MP3 players
- Laptop

There are hundreds of millions of devices in our high tech world that have screens and get dirty with make-up, grease, fingerprints and "schmutz." These are very delicate screens that can scratch easily and be ruined for life. Take care of cameras, cell phones, iPODs, PDA screens, medical devices and even eyeglasses with the scratch-safe iKleen. It hangs on virtually any device and offers a safe microfiber screen cleaner to clean off the "schmutz".
