

Vital Peripheral Equipment

Solving a problem faced by millions of users

Problem:

Screens get dirty, full of grease, make up & "schmutz". They are hard to see and too delicate to just wipe with a cloth or a shirt sleeve.

Need:

A portable, small lightweight cleaner that can attach to any device, or sit in the bottom of a pocket, hand bag or device case.

Solution:

i-Kleen™: Custom printed, in a stock or custom shape, made to carry a brand and solve the cleaning problem with a microfiber cleaning surface that can be used on the most delicate of electronic devices including computers, eyeglasses, camera lenses, cell phones, iPOD and PDA screens.

THE BRANDED SOLUTION

About the i-Kleen™

i-Kleens™ are printed in one or more colors on the front vinyl surface. The branded side is fused to the "microfiber" grey cleaner on the reverse side. The cleaner is the same material used for lens and eyeglass cleaners. It removes scuffs, grease, dirt and other materials from sensitive surfaces.

800 MILLION DEVICES

iPOD - PDA - CELL PHONE

The need is simply overwhelming when you consider just how many devices people own. i-Kleens™ are a rage in Asia and cartoon characters, college mascots and product icons hang from every phone. Special cords, detachable i-Kleens™, expandable coils are all available options to make your i-Kleen™ unique.

Ties to an antenna or loop

Stock or Custom Shapes:

Choose from stock shapes for a minimum order of only 2,500. Have any custom shape (mascot, logo, product shape, anatomical...) in a quantity of 5,000 or more. Prices include one color on white, but add as many colors as you need for an upcharge. Shapes shown are at 50% of actual size.
