I-Kleens are screen cleaners. They hang on cell phones and safely clean the screen, wiping away dirt, make-up and skin oils. They clean PDAs, iPods, eyeglasses, cameras and anything with a screen. The reverse side is made of micro fiber polyester and does not scratch the screen or lens. When you stop to think how small and portable they are and how many times you have a need to clean your screen or glasses, you'll realize it's a promotional product you can't live without.
