

# How Do You Picture Graduation & Proms In An Age Of Digital Photography ?

Film is dead! Long live digital photography. The class of 2007 will be clicking away at graduation and proms taking thousands of shots. Some will be printed, but most will remain in the computer. With digital pictures comes a need for an album into which you can safely store your treasured pictures. Computers will crash, photos can get lost forever unless they are burned onto CDRs or DVDs. The Digi-Album allows the graduate to store his or her pictures for a lifetime. Simply shoot all you want and then burn the CDRs in your computer . Available as DVDR or CDRs.
