

Accountants & Tax Preparers Special Money Saving Offer

Burn Your Client's 2010 Tax Files On Recordable CDRs Decorated With
MasterPieceDisc™ Technology

SHIFT HAPPENS

It's time to shift to CDRs for your client's copy of their tax records. CDRs save your practice time and money. They save your client's filing space. You save on postage. Join the largest tax preparers and go digital to your clients, as you do to the IRS.

PAPER OR PLASTIC

Ease into digital records by asking your clients.. "would you like paper or plastic"? Print copies the old fashioned way, or burn copies for the current generation.

WHY MASTERPIECEDISC™?

It's about your image. A printed label adhered to an office supply disc does not cut it. In a few years, when the label has dried out, the disc may be unreadable. That method actually costs more than a MasterPieceDisc™. Your practice's image is important. The only tangible item presented to a client is their copy of the tax return. Your image is carried with it. Your image is priceless and is the key to referral business.

Production: 5 working days from approval.
Proof included.
Provide 300 DPI art or logo.

Do The Math

A CDR, adhesive labels and toner from an office supply dealer costs over \$1.30 per unit adding waste and labor. Compare that cost to professionally decorated discs at under \$1.00 per unit. Compare postage costs and copy costs. The bottom line.. CDRs save you money.
