

A REAL WAY TO MARK EARTH DAY

APRIL 22, 2011

A single recordable CDR can save one or more trees, hundreds of gallons of fuel, hundreds of pounds of CO2 emissions, steel, carcinogenic chemicals, toner, ink, bleach and more. The minute amount of polymer in a CDR replaces reams of paper, filing cabinets and floor space. It is a great friend of the environment and great friend of the budget for home, school or office. Packaged in a Celebrate Earth Day card, the CDR and card are imprinted to reflect corporate support in "going green": a functional promotion that makes a small, but immediate impact by all who receive it on Earth Day 2012.

5" x 7" - 4/4 custom imprinted card. Printed on SFI certified, environmentally friendly stock, with non-toxic vegetable based ink.

Recordable CDR can hold over 25,000 PDF pages of data

JUST ONE PERSONAL ACT OF GREEN ON EARTHDAY 2011 CAN MAKE A DIFFERENCE

"In recognition of the power of millions of individual actions, Earth Day 2011 will be organized around A Billion Acts of Green®. Personal, organizational and corporate pledges to live and act sustainably... A Billion Acts of Green® inspires and rewards both simple individual acts and larger organizational initiatives that further the goal of measurably reducing carbon emissions and supporting sustainability. A Billion Acts of Green® demonstrates the kind of environmental impact that can be made when millions of people, corporations and organizations make commitments, both small and large, to better their environment.
